

ETHYLENE GLYCOL

## **veriPRO 2100** ANTIFREEZE TESTER

PROFESSIONAL DENSITY GAUGE TO CALCULATE LEVEL OF ANTIFREEZE AND CORROSION PROTECTION AGENT IN ENGINE COOLING CIRCUITS.

Products in the veriPRO series are ergonomically superior and particularly suitable for commercial use. Tailored to suit specific coolants, veriPRO instruments cover a broad range of applications and meet the full service needs of current products on the market.

### veriPRO 2100:

- // Professional gauge designed specially for commercial use
- // Calibrated for all ethylene glycol coolants currently on the market
- // Simple "one-hand operation"; easily legible
- // Special float gauge technology and relay mechanism for precise measurements
- // Extremely accurate measurements (at all temperatures) thanks to bubble-free intake process and constant fill quantities
- // Modern, ergonomic product design
- // Long service life and minimum wear due to special surface structure
- // Robust plastic housing
- // Can be customised

Item No. VP2100

### Areas of application

Passenger cars, trucks, construction equipment, stationary combustion engines

### Technical data

Measurement range	-5 °C to -40 °C
Division	asymmetric
Dimensions <sup>H/W/D</sup>	165 x 57 x 70 mm

INDIVIDUAL

MADE IN GERMANY
